

Accessibility

(Last Updated: May 19, 2025)

Developing material that is universally accessible

We at Emotional Wellness Expo LLC are constantly searching for methods to make our corporate website more accessible. Accessibility was a priority in the design of this most recent business website. Most of our website complies with both the "A" and "AA" W3C standards. We are continually making improvements to be completely compliant throughout the web. This is our long-term goal and commitment.

Modifying the font size

The text on the screen can be resized as follows if you have trouble understanding it:

To modify text size in Google Chrome, you can adjust the zoom level for all webpages or customize the font size for specific websites. You can also use keyboard shortcuts to quickly zoom in or out.

- Here's how to adjust text size in Google Chrome:
 - 1. Change Zoom for All Webpages:**
 - Open Chrome and go to Settings (three dots > Settings).
 - Click on Appearance in the left sidebar.
 - Next to "Page zoom," use the dropdown arrow to select your desired zoom level.
 - 2. Change Font Size:**
 - Open Chrome and go to Settings (three dots > Settings).
 - Click on Appearance in the left sidebar.
 - Next to "Font size," use the dropdown arrow to choose your preferred font size.
 - 3. Use Keyboard Shortcuts:**
 - Ctrl + + (Windows) or Cmd + + (Mac): Zoom in.
 - Ctrl + - (Windows) or Cmd + - (Mac): Zoom out.
 - Ctrl + 0 (Windows) or Cmd + 0 (Mac): Reset to default zoom.
- For Microsoft Internet Explorer, select Text Size from the View menu at the top of your browser and adjust it as necessary.
- For Firefox, select Text Size from the View menu at the top of your browser and adjust it as necessary.

If you're using a different browser, look for instructions in its "Help" section. Your browser has additional accessibility-related features, such as the ability to alter the background and text colors. To learn how to use these features, consult the help section of your browser.

Page Designs

This website's pages are mostly organized in columns, and you'll notice that:

- Panels with relevant information, features, and promotions are located in the right-hand column; the top navigation bar will always have navigation menus to help you navigate the website.
- The page's primary content will always appear in the middle column.

Style guides

You can use the following method to import your own CSS into this website:

In Google Chrome:

- Go to Elements tab (Ctrl + Shift + P and type show elements), if you are not already there, see the Styles tab, now see on right corner, there would be a + icon, click it (or long press that icon if it doesn't automatically add inspector-stylesheet), it will add selector of currently highlighted element.

In Explorer:

Choose Internet Options and Tools.

- Press the button for accessibility.
- Click on up to three checkboxes to ignore colours, font styles or font sizes
- In the same window, to change your stylesheet, select the checkbox: 'Format document using my stylesheet'
- Browse to your stylesheet and click OK

In Mozilla Firefox:

Choose Tools, Options, and then the Content tab. Then, pick your preferred font and color scheme.

Third-party websites

In order to disseminate news and information about www.emotionalwellnessexpo.com goods and services, we may use a variety of third-party websites on our website, including Facebook, Google Maps, X (previously known as Twitter), LinkedIn, Instagram, and YouTube. For people with disabilities, these websites—which are not under the jurisdiction of emotionalwellnessexpo.com—may pose difficulties that we are unable to prevent or address.

The following are the accessibility policies that these third-party websites have made available to the public:
